NE  
Not a complete paragraph

In Phase I, 60% purified water by weight was used, as it allowed complete blending of all other ingredients while maintaining an ideal consistency. 25.7% aloe vera gel was used, as it provided an acceptable level of anti-inflammatory effect and stimulation of the healing process without a greasy or oily feeling. 8% ~~polyvinol~~ [polyvinyl alcohol] crystals was utilized to increase the exfoliative effect of the product without leaving a sticky feeling after drying.
